

ACA/R/56	Dhole Patil College of Engineering	Academic Year: 2025-2026
Rev: 00		Semester: II
Date: 15.12.2016	APPLICATION	Date-

To,

The Respected Faculty Members,
First Year Engineering Department,
Dhole Patil College of Engineering, Pune.

Subject: Request for Attendance Consideration and Extension for Assignment Submission
Due to Participation in National-Level AI Hackathon

Respected Sir/Ma'am,

We, the undersigned students of First Year Engineering Department, Division _____, would like to inform you that we officially represented Dhole Patil College of Engineering, Pune, at the OpenEnv Hackathon organized by Meta PyTorch in collaboration with Scaler School of Technology, conducted at Scaler School of Technology, Electronic City, Bangalore.

The OpenEnv Hackathon is recognized as one of India's biggest AI Hackathons, attracting more than 70,000+ registrations from students, developers, researchers, and AI enthusiasts across the country. After multiple rounds of evaluation and shortlisting, only selected teams and participants were invited to the offline grand finale held in Bangalore. Our teams successfully qualified for this final offline round and participated in the event from 23/04/2026 to 28/04/2026.

Our participating teams and projects were:

- Arsh Pathan – “MaterialForge” (RL environment for inverse molecular design)
- Aaryan Parik – “Libratio” (Multi-agent RL environment for GPU cluster management)
- Aditya Suryavanshi, Shreeshant Bokade, Prajwal Valekar – “GridMind-RL” (RL environment for industrial grid management)

The event involved intensive technical activities including AI environment development, reinforcement learning experimentation, debugging, mentoring sessions, evaluations, and final project presentations. The hackathon required continuous teamwork, collaboration, and long hours of project development.

During the event, we interacted with participants, mentors, and engineers from across India, gaining valuable exposure to real-world AI development, teamwork, and large-scale technical competitions.

As we were representing the college at a prestigious national-level technical event and were fully engaged in hackathon activities throughout the duration of travel and participation, we were unable to attend regular lectures, practical sessions, assignment submissions, and other academic activities during those days.

Therefore, we humbly request all respected faculty members to kindly support us academically by considering the following:

1. Kindly mark our attendance as present for the duration of the hackathon participation and travel period.
2. Grant us additional time for assignment submissions, practical work, records, and any pending academic tasks wherever applicable.
3. Consider providing support regarding attendance and internal evaluation since we participated as official representatives of the college in a national-level AI competition.

We assure you that we remain fully committed to our academics and will complete all pending submissions and coursework within the timeline provided by the respective faculty members.

We are sincerely grateful to the college management, respected faculty members, mentors, and department staff for encouraging students to participate in such prestigious technical events and for continuously supporting innovation, research, and practical learning opportunities beyond the classroom.

This experience has greatly contributed to our technical knowledge, confidence, teamwork skills, industry exposure, and overall academic growth, and we hope to represent the college in many more competitions and technical events in the future.

We kindly request your support and consideration regarding the same.

Thanking You.

Yours sincerely,

1. Arsh Pathan (Div A, Roll No. 64)
2. Aaryan Parik (Div A, Roll No. 63)
3. Aditya Suryavanshi (Div A, Roll No. 54)
4. Shreeshant Bokade (Div A, Roll No. 46)
5. Prajwal Valekar (Div A, Roll No. 57)
